No negative COVID-19 impact on Proton

Proton Motor Power Systems plc (AIM: PPS), the designer, developer and producer of fuel cells and fuel cell electric hybrid systems with a zero-carbon footprint, announces that, having implemented from the onset all recommended protective measures at its factory in Puchheim, it has not been affected, so far, from COVID-19 and there has not been a single case of COVID-19 amongst the Company staff to date. Whilst our staff have to maintain social distancing and other recommended measures to protect themselves against the virus, our factory in Puchheim remains fully open and our production capacity is unaffected.

After a record order intake in the first quarter of 2020 amounting to around EUR 6.4 million, Proton remains on track to fulfill all deliveries to customers in the current production pipeline resulting from this Q1 and previous order intake.
